

Maxwell Ihiaso

Senior Software Engineer with 7+ years of experience building full-stack product features, APIs, internal tools, and customer-facing systems across SaaS, logistics, recruitment technology, and operations-heavy environments. Strong in product ownership, Python-backed workflows, PostgreSQL-friendly application design, TypeScript, JavaScript, React, Next.js, REST integrations, testing, and cross-functional delivery in fast-moving teams.

PROFESSIONAL SUMMARY

Senior software engineer with a track record of owning meaningful product slices end to end, from discovery and implementation through feedback, iteration, and operational improvement. I have grown from hands-on interface delivery into broader full-stack and platform responsibility, contributing across frontend systems, backend services, APIs, automation, and internal tooling. I work well in startup-style environments that require autonomy, rapid change, close collaboration with product and design, and direct exposure to customer needs.

- Full-stack product development
- Python and AI-enabled workflows
- PostgreSQL and data-backed applications
- Linux and cloud environments
- REST APIs and integrations
- Startup ownership and ambiguity
- Customer feedback loops
- Testing and maintainability

EXPERIENCE

Software Engineer, progressing into Technical Leadership

Renda Africa | Lagos, Nigeria (Hybrid)

Jul 2023 - Present

Grew from hands-on product delivery into broader ownership across full-stack implementation, workflow automation, architecture direction, and engineering coordination.

- Owned delivery of product capabilities spanning delivery tracking, invoicing, merchant tooling, admin operations, and internal business systems used to support day-to-day logistics workflows.
- Built backend and platform capabilities in Go and TypeScript, including reusable services, operational APIs, internal tools, and workflow automation that reduced manual coordination for operations teams.
- Delivered real-time tracking experiences integrating event-driven updates, geolocation inputs, provider APIs, and fulfillment orchestration across user-facing and internal systems.
- Built and maintained a reusable rate-card engine supporting dynamic pricing across multiple business units and fulfillment scenarios.
- Led development of a Shopify connector syncing products, inventory, orders, and fulfillment data into internal operational workflows.
- Gathered product and operational feedback, drove architecture discussions, documented implementation decisions, and mentored engineers to improve delivery quality and maintainability.

Senior Full-Stack Engineer

Tidyex | Dallas, USA (Remote)

Nov 2022 - Jun 2025

- Built customer-facing and internal product features for bookings, payments, dashboards, and operational workflows using Next.js, TypeScript, Strapi, Payload CMS, and supporting backend logic.
- Integrated business systems across CRM, finance, and inventory tooling to automate customer and service operations and reduce administrative busy-work.
- Worked closely with non-engineering stakeholders to refine workflows, troubleshoot issues, and iterate quickly on high-value features.
- Supported data-backed applications and modular content systems that enabled faster product updates and smoother operational maintenance.
- Implemented automated testing with Cypress to improve release confidence and reduce regressions in critical user journeys.

Technical Solutions Specialist

Jobberman Nigeria | Lagos, Nigeria

Feb 2021 - Jun 2023

- Built internal tools, reporting systems, and workflow automation for recruitment operations using React, Zoho Creator, and integrated business logic.
- Automated applicant tracking, reporting, and hiring workflows to reduce manual effort and improve operational throughput.
- Delivered analytics and reporting solutions that improved visibility into pipeline performance and operational outcomes.
- Worked closely with internal users to understand workflow pain points and translate them into maintainable technical improvements.

Senior Frontend Engineer

CyberME Studio | Riyadh, Saudi Arabia (Remote Contract)

Aug 2022 - Nov 2022

- Led frontend modernization with React and TypeScript while contributing to more modular, maintainable application architecture.
- Partnered with design and delivery stakeholders to implement polished product flows and reusable component patterns.
- Improved application performance, accessibility, and maintainability across client-facing experiences.

Software Engineer

Upwork | Remote

Feb 2019 - Feb 2022

- Delivered full-stack product features, APIs, automations, and integrations for international clients across healthcare, e-commerce, and business operations.
- Built web applications and backend services using JavaScript, TypeScript, React, Node.js, and related tooling, often working from ambiguous requirements to production delivery.
- Joined client conversations to gather requirements, clarify feature gaps, ship quickly, and support systems after launch.

CORE SKILLS

Python

PostgreSQL

Linux

AI Workflows

Product Ownership

Node.js

TypeScript

JavaScript

Go

REST APIs

System Design

MongoDB

Redis

Docker

AWS

GCP

CI/CD

Git

Testing

Cypress

Playwright

React

Next.js

STRENGTHS

Full-stack ownership, product-minded engineering, API design, operational tooling, customer feedback loops, documentation, mentoring, cross-functional collaboration, and delivery in remote teams.

Targeting senior product and full-stack engineering roles that value ownership, small-team execution, Python-friendly environments, AI adoption, customer empathy, and high-quality feature delivery.

EDUCATION

M.Sc. Computer Science

University of Lagos, Lagos

Oct 2024

B.Eng. Materials and Metallurgical Engineering

Federal University of Technology, Owerri

Dec 2017
