

Maxwell Ihiaso

Senior backend-oriented software engineer with 7+ years of experience building APIs, internal platforms, cloud-connected product systems, and operational tooling across logistics, SaaS, recruitment technology, and customer operations. Strong in Node.js, TypeScript, Go, JavaScript, REST integrations, system design, and cross-functional technical leadership.

PROFESSIONAL SUMMARY

Engineer with a track record of moving from hands-on frontend execution into broader backend and platform ownership. At Renda, I progressed from a public-facing Senior Frontend Developer profile into wider engineering responsibility, contributing to backend services, operational APIs, architecture direction, technical reviews, and team guidance. I work comfortably across product and infrastructure concerns, building maintainable systems, collaborating closely with frontend and product teams, and shipping reliable software in fast-moving environments.

- Node.js and TypeScript
- Backend APIs and services
- System design and scalability
- Cloud-native delivery
- Distributed workflows
- MongoDB and CMS-backed systems
- CI/CD and operational tooling
- Code reviews and mentoring

EXPERIENCE

Software Engineer, progressing into Technical Leadership

Renda Africa | Lagos, Nigeria (Hybrid)

Jul 2023 - Present

Public profile initially positioned as senior frontend work, with scope expanding into backend delivery, platform design, technical leadership, and cross-team engineering ownership.

- Led architecture and implementation for logistics workflows spanning delivery tracking, invoicing, merchant tooling, admin operations, and internal business systems.
- Built backend and platform capabilities in Go and TypeScript, including reusable services, operational APIs, internal tools, and business workflow automation.
- Delivered real-time delivery tracking systems integrating event-driven updates, geolocation inputs, provider APIs, and fulfillment orchestration.
- Built and maintained a reusable rate-card engine to support dynamic pricing across multiple business units and fulfillment scenarios.
- Led development of a Shopify connector syncing products, inventory, orders, and fulfillment data into internal operational workflows.
- Drove technical direction through architecture documentation, delivery reviews, CI/CD improvements, mentoring, and pragmatic collaboration across engineering teams.

Senior Full-Stack Engineer

Tidyex | Dallas, USA (Remote)

Nov 2022 - Jun 2025

- Built customer-facing and internal platforms with Next.js, TypeScript, Strapi, Payload CMS, and supporting backend logic for bookings, payments, dashboards, and operational workflows.
- Integrated Zoho CRM, Books, and Inventory systems using Deluge and custom backend logic to automate customer, finance, and service operations.
- Improved reliability by tightening reconciliation flows across bookings, payments, and service fulfillment systems.
- Worked with modular content systems and CMS-backed applications built on document-oriented data models, supporting faster delivery and lower operational overhead.
- Implemented automated testing workflows with Cypress to improve release confidence and reduce regressions in critical flows.

Technical Solutions Specialist

Jobberman Nigeria | Lagos, Nigeria

Feb 2021 - Jun 2023

- Built internal tools, reporting systems, and workflow automation for recruitment operations using React, Zoho Creator, and integrated business logic.
- Automated applicant tracking, reporting, and hiring workflows to reduce manual effort and improve operational throughput.
- Delivered analytics and reporting solutions that improved visibility into pipeline performance and operational outcomes.
- Partnered with stakeholders to translate business processes into maintainable technical systems and internal product improvements.

Senior Frontend Engineer

CyberME Studio | Riyadh, Saudi Arabia (Remote Contract)

Aug 2022 - Nov 2022

- Led frontend modernization with React and TypeScript while contributing to more modular, maintainable application architecture.
- Partnered with design and delivery stakeholders to implement polished product flows and reusable component patterns.
- Improved application performance, accessibility, and maintainability across client-facing experiences.

Software Engineer

Upwork | Remote

Feb 2019 - Feb 2022

- Delivered backend and full-stack solutions for international clients across healthcare, e-commerce, and business operations.
- Built web applications, APIs, automation scripts, and integrations using JavaScript, TypeScript, React, Node.js, and related tooling.
- Worked directly with clients to scope requirements, ship quickly, and support production systems after launch.

CORE SKILLS

Node.js

TypeScript

JavaScript

Go

Python

REST APIs

System Design

Microservices

Distributed Systems

MongoDB

PostgreSQL

Redis

Docker

AWS

GCP

CI/CD

Git

Testing

Cypress

Playwright

STRENGTHS

Backend ownership, technical leadership, API design, operational tooling, performance-minded implementation, documentation, mentoring, cross-functional collaboration, and delivery in remote teams.

Seeking senior backend roles centered on Node.js, TypeScript, APIs, scalable services, documentation, testing, code quality, and collaboration across product and engineering teams.

EDUCATION

M.Sc. Computer Science

University of Lagos, Lagos

Oct 2024

B.Eng. Materials and Metallurgical Engineering

Federal University of Technology, Owerri

Dec 2017
