

Maxwell Ihiaso

Senior Software Engineer with 7+ years of experience building scalable product experiences across logistics, operations, SaaS, and internal platforms. Strong in React, Next.js, TypeScript, frontend architecture, reusable UI systems, REST API integration, Python-backed workflows, FastAPI collaboration, AI and LLM-enabled features, testing, AWS-backed delivery, and cross-functional execution.

PROFESSIONAL SUMMARY

Software engineer who has grown from hands-on product development into broader technical ownership. Across recent work at Rackoon and Renda, my scope has included shipping user-facing experiences, integrating with REST APIs, collaborating on Python and FastAPI services, supporting AI and LLM-enabled product workflows, and contributing to cloud delivery on AWS. I build responsive, maintainable interfaces with React, Next.js, TypeScript, HTML, and CSS while working comfortably across backend concepts, testing, infrastructure, and the product decisions needed to ship reliable software in fast-moving environments.

- React and Next.js
- TypeScript, HTML, CSS
- Reusable UI components
- REST API integration
- Python and FastAPI
- AI and LLM workflows
- Frontend architecture
- Responsive and accessible UI
- Playwright and Cypress
- AWS cloud delivery
- Cross-functional collaboration
- Mentoring and code reviews

EXPERIENCE

Software Engineer

Rackoon | Remote

Jun 2025 - Present

Worked across backend, frontend, and cloud responsibilities for AI-enabled and service-driven platforms.

- Built and refined product capabilities across frontend and backend using React, Next.js, TypeScript, and service-layer integrations for user-facing and internal workflows.
- Integrated applications with REST APIs and worked with Python and FastAPI services to support reliable data exchange, workflow orchestration, and product delivery.
- Contributed to AI and LLM-related features, translating product requirements into practical system behavior and usable interfaces.
- Supported cloud deployment and operational work on AWS while improving maintainability across application architecture and integration patterns.

Software Engineer, progressing into Technical Leadership

Renda Africa | Lagos, Nigeria (Hybrid)

Jul 2023 - Present

Expanded from hands-on engineering into wider ownership across frontend delivery, backend collaboration, architecture reviews, and team guidance.

- Built and evolved operational dashboards, merchant tooling, tracking interfaces, and admin workflows that supported logistics execution and internal platform users.
- Shipped product features with React, Next.js, TypeScript, HTML, and CSS while partnering closely with backend engineers on API contracts, data flows, and release quality.
- Created reusable frontend patterns for forms, workflow-driven screens, and data-heavy product experiences to improve delivery speed and UI consistency.
- Integrated frontend applications with internal and external services, including real-time delivery tracking, provider APIs, and workflow automation systems.
- Contributed to backend and platform capabilities in Go and TypeScript, helping bridge frontend requirements with service behavior, performance, and maintainability.
- Led technical reviews, mentored engineers, and helped drive architecture decisions, delivery planning, and engineering standards across teams.

Senior Full-Stack Engineer

Tidyex I Dallas, USA (Remote)

Nov 2022 - Jun 2025

- Built customer-facing and internal web applications with Next.js, React, TypeScript, Tailwind CSS, Strapi, and Payload CMS for bookings, payments, dashboards, and operational workflows.
- Designed modular page structures and reusable UI sections that made iteration faster across product, marketing, and operations surfaces.
- Integrated frontend experiences with backend services, CMS platforms, and business systems to automate finance and customer operations.
- Improved release confidence by implementing end-to-end test coverage with Cypress and tightening critical user flows.
- Worked across product, operations, and implementation teams to troubleshoot issues quickly and keep interfaces reliable and user-friendly.

Technical Solutions Specialist

Jobberman Nigeria I Lagos, Nigeria

Feb 2021 - Jun 2023

- Built internal tools and customer-facing interfaces with React and workflow tooling to support recruitment operations and employer workflows.
- Automated applicant tracking, reporting, and hiring workflows using integrations and business logic that reduced manual effort for operations teams.
- Delivered analytics and reporting views that improved visibility into hiring pipelines and platform usage.
- Partnered with internal stakeholders to translate business problems into practical, maintainable interfaces and workflow improvements.

Senior Frontend Engineer

CyberME Studio I Riyadh, Saudi Arabia (Remote Contract)

Aug 2022 - Nov 2022

- Led frontend modernization using React and TypeScript with a more modular, component-driven application structure.
- Worked closely with design stakeholders to deliver polished user flows, reusable UI patterns, and stronger visual consistency.
- Improved application responsiveness, accessibility, and maintainability across client-facing experiences.

Software Engineer

Upwork I Remote

Feb 2019 - Feb 2022

- Delivered web applications, APIs, automations, and integrations for international clients across healthcare, e-commerce, and business operations.
- Built with JavaScript, TypeScript, React, Node.js, and related tooling, balancing speed of delivery with maintainable implementation.
- Worked directly with clients to scope requirements, ship features quickly, and support production systems after launch.

CORE SKILLS

React

Next.js

TypeScript

JavaScript

HTML

CSS

REST APIs

Python

FastAPI

AI Features

LLM Integrations

Tailwind CSS

Material UI

Node.js

Go

AWS

Playwright

Cypress

Git

CI/CD

Reusable Components

Responsive Design

Accessibility

STRENGTHS

Frontend architecture, component-driven development, backend collaboration, AI-enabled product work, API integration, cloud delivery, code reviews, mentoring, fast iteration, and ownership in remote teams.

TOOLS

React, Next.js, TypeScript, Python, FastAPI, Node.js, AWS, Tailwind CSS, Material UI, Playwright, Cypress, Git, CI/CD, REST APIs, AI tooling, and LLM-enabled product workflows.

EDUCATION

M.Sc. Computer Science

University of Lagos, Lagos
Oct 2024

B.Eng. Materials and Metallurgical Engineering

Federal University of Technology, Owerri
Dec 2017
